Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,10,13,14,17-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Neumeyer (4,779,765).

Neumeyer discloses a system for distributing first and second materials including first and second sources (12,14), a plurality of distribution units (42,44), and a nurse distribution mechanism 28. Concerning claim 17, the first and second primary lines are considered the area between the bottom of hoppers 12 & 14, and the interior of chamber 28, with the valve being considered arrangement 100. Concerning claim 13, distribution units (42, 44) are also considered meters. Concerning claim 14, nurse distribution mechanism 28 is considered an inductor box. Concerning claim 20, arrangement 100 is considered the coupling mechanism. Concerning claim 22, Neumeyer discloses using the invention to deliver two granular materials such as seed and fertilizer (col. 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Neumeyer (4,779,765).

Neumeyer discloses a system as described previously, but lacks a third source holding a third material. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device of Neumeyer by providing a third source and a third primary line coupled to the nurse header since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. V. Bemis Co.*, 193 USPQ 8.

Allowable Subject Matter

Claims 3-9,11,15,16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
